### SKILLS

#### TECHNICAL

InDesign	Web Design	Color Theory
Illustrator	HTML/CSS	Layout Design
Photoshop	WordPress	Print Design
Dreamweaver	Typography	Photography
Acrobat	Branding	

#### TRADITIONAL

Illustration	Figure Drawing
Sketching	Composition
Painting	Realistic Rendering
Mixed Media	Visual Storytelling

#### QUALITIES/SOFT SKILLS

Brainstorming Design Concepts	Time Management
Attention to Detail	Verbal Communication
Creative Collateral Marketing	Written Communication
Collaboration in a Team	Critical Thinking
Quick Adaptability	Responsive Design
Presenting of Ideas	

### EXPERIENCE

● Impressions WHQ Inc,  
State College, PA

March 2025 - June 2025

#### Graphic Design Intern

##### Designed Marketing Assets

- Email Blasts
- Landing Pages
- Print/Digital Ads
- Brochure/Flyers
- Signage
- Logos

- Collaborated with the team and clients
- Managed multiple projects
- Developed sketches and concepts
- Contributed to creative brainstorming
- Prepared and optimized files for print and digital production

**FF Dax** is a humanist sans-serif typeface published by **FontFont**, a foundry based in Kreuzberg, Berlin, Germany. Dax was created from 1995 to 1997 by **Hans Reichel**, a German type designer. Ultimately, Reichel designed Dax to have a modern but elegant feel that could be used in advertisements, packages, book texts, editorials, logos, brands, posters, billboards, wayfinding systems, signs, and web designs.

FF Dax comes in 36 weights including *Italica*, ranging from light to **black** in condensed, normal, and wide. The typeface contains typographic features such as ligatures, small capitals, alternate characters, case-sensitive forms, fractions as well as super- and subscripts.

In 1998, FF Dax received The Big Crit award. The completed FF Dax super family includes FF Dax Compact and FF Daxline.

## GREEN TEA EVOLUTION

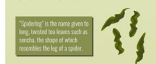

### THE PROCESS

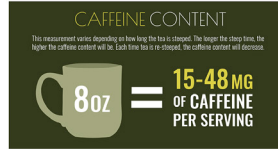

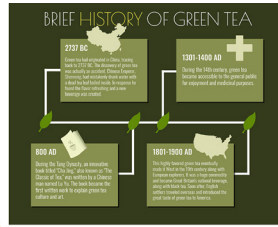

**DRIVING PERIOD**  
The amount of oxidation during the drying cycle determines the final color of the tea. Green tea is among the leaves requiring a shorter drying period, where the leaves keep their green color.

**HEATING PERIOD**  
When the moisture evaporates, the leaves are transferred to the heating period for cooking. Heating methods will vary due to the techniques and region. Chinese green teas take the most time approach where the tea is pan or wok roasted, leaving them paler in color. The Japanese method is steep steam the tea, giving them a brighter green color.

**ROLLING PERIOD**  
The last step is to roll, cut, or twist the tea leaves by hand to bring out any excess water or sap. This part of the process also helps define the different tea types.

DID YOU KNOW?  
**GREEN TEA IS NOT ALWAYS GREEN** | **MOST GREEN TEAS ARE ACTUALLY PALE YELLOW**
